Experiment 6 : Programs illustrating the Concept of Tuples

1 - Create a tuple and try to changing the value of any one element, also display the length of list

2 - Create a tuple having single element and append two tuple

3 - Create a tuple and sort it

4 - Create a tuple and print the sum of all the element

5 - Programs to compare the element of tuple

6 -Program to find maximum and minimum of tuple

7 - Count the occurrence of element in tuple in a specific range

8 - Reverse a tuple

9 - Write a loop that traverses the previous tuple and prints the length of each element
